SITE HISTORY REPORT  
Burlington Northern East Bridger Train Derailment  
East Bridger, Montana 59019

The Burlington Northern East Bridger Train Derailment, EPA ID#MTD980635320, is located approximately one mile east of Bridger, Montana in Carbon County. The train derailment occurred on March 22, 1974 and an unknown amount of the hazardous chemical phenol was spilled on the ground. High altitude aerial photos were taken in 1982 and at that time there was no visible indication that a hazardous chemical spill or train derailment occurred at the East Bridger site. No further historical information pertaining to the train derailment could be found.
